Blog sheet

This sheet should be used to display blog documents.

giu 01 2009

The first post of your wiki's blog

This is your wiki's blog first post. Its goal is to provide a short description of your blog's main features.

- You can **create new blog posts** through the input field located on [your Blog's homepage](#) . A post can have one of the following statuses:
 - *Unpublished*: your post is still a draft. It can be seen by its creator & by admins. Once you've clicked published once, you cannot unpublish a post. However, you can choose to hide it.
 - *Published*: your post can be read by every user that has access to your blog.
 - *Published & hidden*: your post is published but only its creator & admins can see it. This is useful if you need to make modifications on a post that has already been published by mistake.
- Every blog article can be **tagged** and/or **categorized**:
 - You will be able to browse posts by category using the panel located on the left of the page
 - You can create new categories & subcategories when creating a new post
 - The use of tags allows your article to be found by browsing your wiki's tags, along with any other wiki document
- **Blog-specific panels** are available on the left of your blog page:
 - The *recent posts* lists the most recent entries to any visitor of the blog
 - The *unpublished panel* lists the blog posts you created, but didn't yet publish
 - The *categories panel* lets you browse blog posts listed by category & subcategory
 - The *archive panel* lets you browse blog posts by publication date

Happy blogging!
